

Senior Product Manager – Digital Factory (m/f/d)

Starting asap – Düsseldorf (Hybrid)

RIICO

Your Responsibilities

- Define and execute the product strategy, roadmap, and vision.
- Collaborate closely with founders, engineers, and other stakeholders to prioritize features and define the product scope.
- Gather and analyze user feedback to continuously improve the product and enhance the user experience.
- Work closely with the development team to translate product requirements into actionable user stories and ensure timely delivery.
- Lead cross-functional teams and effectively communicate the product vision to drive alignment and collaboration.
- Stay up to date with industry trends, emerging technologies, and best practices in manufacturing and factory simulation

Requirements

- Bachelor's or Master's degree in a relevant field or equivalent practical experience.
- Minimum of 5 years of experience as a Product Manager, preferably in the manufacturing or industrial automation domain.
- Demonstrated track record of defining and executing successful product strategies and roadmaps.
- Excellent prioritization and scope management skills, with the ability to make data-driven decisions.

Preferred Qualifications

- Experience in a startup environment.
- Knowledge of factory simulation concepts and technologies.
- Understanding of architecture and development process of complex software products
