Infrastructure Engineer Full-Time (m/f/d)

Starting ASAP – Düsseldorf (hybrid)

RIIICO

Your Responsibilities

- You are responsible for the architecture and development of our cloud infrastructure

- You orchestrate our microservice apps on Kubernetes clusters

- You closely cooperate with frontend & backend teams to ensure fast, high-quality deployments

- You provision the infrastructure and compute services for ground-breaking AI research and features

Your Skills

- You can thrive in a dynamic environment and can solve new problems quickly

- You can work independently and focused, building cloud infrastructure and shaping architecture from the ground up

- You have completed a technical or scientific study program (B.Sc./M.Sc.)

- You have 1+ years of professional working experience in infrastructure-related programming in Python, JavaScript, or C++

- You are an enthusiastic Linux user

What We Offer

Great Salary	Company Shares	Outstanding Career Opportunities
Company Benefits	Technology Pioneers	Modern Office Culture

Your Non-Plus-Ultra

- You are proficient in AWS or Google Cloud

- You have experience with Infrastructure-as-Code (IaC) development (Pulumi, Terraform)

- You have designed microservices with Docker and Kubernetes
